DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Bessho `169.

3. Bessho discloses a display, a plurality of decision making means, a wagering means, a processor including a random means, a display for including a plurality of symbols oriented in an RXC matrix, and a processor including means to change the location of one or more symbol if the first outcome is not recognized by the paytable such that the one or more symbols move from their first outcome orientation to a different area in the RXC matrix to provide a second outcome recognized by the comparison means to be on the table (column 1, line 66 – column 4, line 67).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Weiss `971 discloses a gaming device and method that allows a primary display and secondary display to be correlated to the extent that symbols of the primary display have vectors which direct that symbol associated with the vector onto the secondary display.

Holmes `662 discloses a slot machine of allowing a player to increase a wager after the reels have begun spinning.

Inoue '524 discloses a slot machine with a plurality of motors each arranged for rotating a respective one of plurality of reels, a first driver device that start driving the motors in response to a start signal, and stops driving the motors in accordance with a stop signal.

Georgilas '712 discloses the enhancement of the winning potential of a player while increasing player interest in the game.

McGinnis '377 discloses a wagering game against the house, which includes the steps of wagering an amount of credits randomly selecting at least two primary sets of symbols and randomly selecting at least one secondary set of symbols.

Crawford '412 discloses a video machine wherein a player is allotted to save in memory one or more symbols from one or more previous games and use those symbols in a current game to obtain a winning combination.

Smyth '537 discloses a slot machine displaying reels provided with a plurality of symbols occupying differing proportions of the circumferences of the reel, such that those symbols, which require greater prominence, occupy a larger proportion of the circumference.

Kirk UK '571 discloses a fruit machine during a winning combination is obtained as a result of a hold, hop, nudge, or jump game feature.

Parker UK '922 discloses a fruit machine having a nudge feature determined by the preferably accelerating advance of the illumination through the associated column.

Wain UK '712 discloses a coin operated machine wherein a player can stake some or all of the win value on a secondary game, which may also involve the selection of symbols with the reel, and the counter is appropriately incremented if a win is achieved with the secondary game.

Edward UK '984 discloses a fruit machine having a nudge feature may be awarded whereby any of the reels may be indexed any number of times by pressing the nudge buttons provided that the total number of the nudges does not exceed the number initially awarded.

Parker UK '782 discloses a fruit machine having a proposed feature for reverse nudging as alternative to forward nudging.

Arnold UK '781 discloses a fruit machine having a primary nudge feature by a primary nudge feature selector.

Attachment for PTO-948 (Rev. 03/01, or earlier)
6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.
